GRDA ECOSYSTEMS & EDUCATION CENTER

The dream will soon be a reality...

After seven years of plans and dreams, the Grand River Dam Authority is proud to announce the GRDA Ecosystems & Education Center will soon be a reality.

Located next to Pensacola Dam, in Langley, the facility will not only house GRDA's Ecosystems Management Department, water quality laboratory and lake permitting operations, it will also be a visitor center, providing the public with information about the lake region and its history. Public meeting space and the Grand Lake Chamber of Commerce offices will also be included.

GRDA cordially invites you to be a part of this very special project by attending the construction launch celebration on

Friday, August 22, 2008 at 10:00 A.M.

Once referred to as the "home of the million dollar view" the site is located just west of Pensacola Dam in Langley, OK.

For more information contact Lori Starks at 918-256-5545 or lstars@grda.com.
